

3500 PU Striking Roller

For Cleaning Chevron Belts

The PU striking roller is an option when a belt scraper can not be used because there are no chevron belts fitted on the belt.

The polyurethane striker sleeves are fitted onto a return roller that strikes the belt 5-7 times per second at normal belt speed, which means that any particles that are attached fall off.

ART.NO.	B-B	RL	EL	AL	AMOUNT SLEEVES	L
3505	500	600	608	638	3	100
3506	650	750	758	788	3	125
3508	800	950	958	988	4	125
3510	1000	1150	1158	1188	4	150
3512	1200	1400	1408	1438	5	150
3514	1400	1600	1608	1638	6	150

3501 The PU striker sleeves are cut to the desired length. Max 1200 mm.

3463 - 3499 Discus Belt Support

Belt Friendly Guidance

The Diskus belt support is a side guide disc of polyurethane which is pressed onto a return roller and is locked into place with a set screw.

The Diskus reduces the risk that the belt cuts into the framework.
