

8700 Mini Scraper for PVC Belting Not Food Approved

The Miniscraper 8700 is a small belt cleaner that is ideally suited for PVC belts in for example, the recycling industry. The scraper is for pulleys from $\varnothing 100$ - $\varnothing 200$ mm.

Our unique spring lever ensures that the correct pressure is maintained against the belt which simplifies service work and reduces maintenance. The pressure on the belt is steplessly regulated with a torsion spring fitted in the square tubing.

The pre-scraper is positioned against the drive pulley immediately below the flow of material.
